KEY INSIGHTS

Demographic Targeting

Correctly identified the importance of the Gen Z demographic and the use of cultural influencers (Nigerian artists) to build brand resonance.

Community Focus

Recognized that community inclusion can be a lever for brand loyalty beyond simple transactional relationships.

AREAS FOR IMPROVEMENT

Lack of Strategic Frameworks

Failed to utilize business models or data-driven reasoning to justify marketing suggestions.

Professional Delivery

The use of fragmented sentences, informal abbreviations, and significant typos is inappropriate for a Masters-level business simulation.

Inability to Pivot

When asked to differentiate from a competitor without using price, the response was to ask for clarification rather than proposing a unique value proposition.
